

---

I was recently given the opportunity to watch the movie, Sadda Adda. It was a fairly well-done movie that all in all I would give a three out of five. The dialogue is in Hindi with English subtitles, which was really cool because it's fairly rare to find movies where you can watch them from both languages so easily without having to switch back and forth between them. The audio isn't better than the subtitles, but if you're bilingual or used to reading while listening then it might be worth a try! Hi guys! Today we'll be talking about a different film for your entertainment - Sadda Adda aka We Still Kill/Deadly Attack in English. A young couple named Prannoy and Nandita go on a tour in India to film a documentary about the people and culture of India. They find a six-year-old orphan named Aliya in the local orphanage they visit and bring her along with them for two years in their travels, returning with a montage of memories, moments of sadness, and the bittersweet life lessons you learn from having fun. I recently had the chance to watch this movie which was dubbed into English. I chose the Hindi version because the audio is better than the English dubbed version. The audio is so quiet that you can barely hear what's being said or thought. That wasn't a problem for me because I was reading while I watched the movie, but for other people it might be. The dialogue in the English version is very repetitive, and one thing that really got on my nerves is that it's dubbed into english. They could've made this movie in either Hindi or English- how hard is that? Just stick with either one of them and you're fine! Well, maybe not fine but at least good. The story isn't anything new or original, which makes this film lose some appeal to me. There are similar movies to this with similar plots but you don't have to watch all of them if you don't want to. It was a good experience watching this director's work, but it wasn't great. The message of the movie is nice and inspiring, and it's one of those movies where you watch and you learn something from it. You should still give this one a shot. It's worth it just to get an idea of what India is like and their culture. It'll be something new for you to experience! The movie Sadda Adda is about a young couple named Prannoy and Nandita who go on a tour in India to film a documentary about the people and culture of India. They end up finding a six-year-old orphan named Aliya in the local orphanage they visit and bring her along with them for two years in their travels, returning with a montage of memories, moments of sadness and bittersweet life lessons you learn from having fun.
